DETAILED ACTION

Examiner's Statement

1. Applicants' amendments and arguments, filed on 7/30/2004, with respect to Claims 1-10 have been fully considered. The 35U.S.C.102(e) and 103(a) rejections have been overcome by rewritten those objected claims – dependent claims in independent form including all of the limitations of the base claim and any intervening claims. Applicant cancels Claims 1, 2, 4-6, and 8-10. None of the previously cited reference teaches the amended independent Claim 3. The applicant add a new claim 11 to the application

Allowable Subject Matter

2. Claims 3, 7, and 11 are allowed.
3. The following is an examiner's statement of reasons for allowance.
 - The prior art fails to teach an apparatus of Claims 3 and 11 that specifically comprises the following:
 - The instant application is deemed to be directed to a non-obvious improvement over the invention patented in Pat. No. 5,956,367 cited by the applicant and Pat. No. 6,452,959 in view of Pat. No. 5,936,999. The improvement comprises that receiving one bit of the plurality of output data bits and controlling whether output of the input spreading coding code should be enabled or disabled in accordance with the value of the one bit. This configuration allows spreading codes to be generated

automatically and continuously and reduce the LSI chip area and power consumption of the circuit.

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
